CO R PO R AT E

UNA FILOSOFIA AZIENDALE SEMPLICE: IDENTITÀ, AFFIDABILITÀ, QUALITÀ DELLA VITA.

L'azienda, operatore dal 1976 in questo settore, negli ultimi anni ha "fatto le valigie" e si è aperta ai mercati esteri. Così, ad oggi siamo sufficientemente piccoli da essere flessibili e attenti alle esigenze del cliente, ma anche abbastanza strutturati da garantire presenza nel servizio, continuità ed affidabilità del prodotto. È questa la nostra visione aziendale: accettare le sfide di un mercato e di una tecnologia che cambiano continuamente, mantenendo però la nostra identità. L'identità, cioè, di un'azienda sana, che nasce dalle persone e alle persone si rivolge, dando rispetto a loro e anche all'ambiente in cui vivono.

A SIMPLE CORPORATE PHILOSOPHY: IDENTITY, RELIABILITY AND QUALITY OF LIFE.

Our firm, established in 1976 operating in Automotive sector since then - has packed its suitcases and got ready to travel to foreign markets. So now, we are small enough to be flexible and responsive to the customer's needs, but also fully equipped to ensure constant service, continuity and product reliability. This is our corporate vision: to accept the challenges of a continually changing market and technology, while maintaining our own distinctive identity. The identity of a company of integrity, formed by people to serve people, with respect for them and the environment in which they live.

Si prega di prestare attenzione: il tendicatena contenuto in questo kit è caricato a molla e potrebbe provocare danni se maneggiato in modo errato. TECHNICALS INFORMATIONS

Please be aware that the tensioner contained in this kit is sprung loaded and could cause injury if handled incorrectly. Do not remove pin until fitted and always ensure the piston is facing away from you or anyone else within a 20 metre radius.

PRECAUZIONI

Per impedire un danneggiamento prematuro del kit devono essere prese le seguenti precauzioni:

- L'olio e i filtri devono essere sostituiti con nuovi filtri.
- La coppa dell'olio e il pescante dell'olio devono essere controllate per verificare che non vi siano residui che ostruiscono la pompa di pescaggio dell'olio riducendone il flusso (specialmente nei veicoli 4x4) NB: il pescante dell'olio se danneggiato dovrebbe sempre essere sostituito.
- Tutti i solenoidi che sono utilizzati per regolare i mozzi devono essere controllati e all'occorrenza sostituiti.
Nota: se un solenoide non funzionante non viene sostituito il nuovo mozzo non funzionerà in modo corretto e il motore potrebbe essere severamente danneggiato.
- Accertarsi sempre che il tendicatena sia in tensione prima di avviare il motore. Se il tendicatena non è agganciato completamente con la catena, potrebbe verificarsi la rottura del motore.

PRECAUTIONS

To prevent premature failure of your timing chain kit, the following precautions must be taken:

Oil and filters must be replaced with new filters.

- Sumps/Oil pans must be checked to ensure they are not damaged and any minor damage found does not obstruct the oil pick up pipe reducing oil flow (particularly on 4x4 vehicles). NB: Damaged sumps should always be replaced.
- All oil feed solenoids that are used to regulate hubs MUST be checked and replaced if required. Note: If a faulty solenoid is not replaced the new hub will not operate correctly and the engine could severely damaged.
- Always ensure that the tensioner has been deployed correctly before starting the engine. If the tensioner is not fully engaged with the chain/rail, serious engine failure could occur.
